2019
Sustainability Showcase
October 28th - 30th
Kendeda Building for Innovative Sustainable Design
422 Ferst Dr NW, Atlanta, Georgia 30313

You are invited to the inaugural Georgia Tech Sustainability Showcase. At the Showcase, you will hear from and can connect with ~150 academic and research faculty as they share their work in sustainability research and education. Talks will be provided in a fast-paced lightning format covering topics that span the engineering, natural science, social science, business, planning, design, and computing disciplines.

From buildings to transportation, finance to logistics, climate to energy, cities to farms, manufacturers to workers, and profit to equity – find out what is going on right now at one of the world’s preeminent research and teaching universities. At the Showcase, you can also explore the brand new Kendeda Building for Innovative Sustainable Design, the most environmentally advanced education and research building ever constructed in the Southeast.

Three days subdivided into six half days
